INTEGRATED AIR SOLUTIONS

INTEGRATED AIR SOLUTIONS

Superior compressed air solutions for all your sustainable air needs

Integrated Air Solutions is a specialist compressed air solutions provider dedicated to delivering air reliably and efficiently, helping companies achieve their productivity targets and keeping the total cost of ownership low.

With access to a widely diverse portfolio of premium brand products, **Integrated Air Solutions** offers a broad range of innovative and technologically superior compressed air systems, parts, services and turnkey solutions for the mining, pharmaceutical, cement, petrochemical and general industrial market segments.

Our offerings include oil-lubricated and oil-free rotary screw compressors, centrifugal compressors and diesel portable compressors. We provide upstream and downstream air treatment solutions such as refrigerant and desiccant driers, air receivers and filters.

Our product portfolio comprises **ELGi** range of compressors, **FS-ELLIOTT** oil-free centrifugal compressors, **ABC Compressors** for the PET industry, and **AIRCOM** aluminium piping systems.

Our expert service teams are trained to maintain and support all brands of air compressors. We overhaul and service air ends, refurbish complete compressors and undertake professional air audits and pipe installations.

Our innovations include MethaSpense – patented technology that significantly reduces dust propagation and associated risks in underground mining applications.

When it comes to providing engineered high-pressure diesel compressor packages, Integrated Air Solutions is the unrivalled market leader, having supplied customised solutions for the water-well drilling and mining industry for decades.

Our **rental division** comprises a range of electric and diesel portable compressors to meet the needs of customers who prefer the benefits of renting over purchasing, and to support our sales division where we are able to offer our customers reliable temporary solutions while they wait for their existing compressor to be replaced or repaired. This approach ensures that our customers have the highest up-time, productivity and return on their rental investment.

COMPRESSOR SERVICE AND MAINTENANCE

Integrated Air Solutions offer services, repairs and maintenance of all brands and makes of air compressor systems using genuine spare parts.

Whether on-site or in our service centre, our service professionals are always available, ensuring fast, efficient and reliable provision of original spare parts and quality service, repairs and maintenance of air compressor systems at short notice.

- Technical advice and troubleshooting
- Servicing using genuine spare parts
- Repairs, rebuilds and re-packaging
- Air audits and health checks
- Air-end repairs, overhauls and rebuilds
- Turnkey project solutions

Air Audits

Integrated Air Solutions' Air Audit is a highly specialised service that enables users to identify ways to improve the performance and energy efficiency of their compressors.

Air end overhaul

Integrated Air Solutions offers an air end rebuild service for all makes and types of air compressors. This offers a more economical solution to new high priced factory exchange air ends or factory rebuilt units.

We guarantee that your air compressor will run smoothly and efficiently again. Our air end overhauls are renowned for "Long Run! Long Life!"

CUSTOM-ENGINEERED SOLUTIONS

Innovation goes beyond our products and is in the work culture we promote, the solutions we tailor for industries and the services we offer our customers.

Long-term partnering has been our key differentiating factor. We collaborate with our customers to understand their changing needs and design solutions accordingly. Customisation and re-packaging of diesel-driven compressors for the drill rig industry is a unique strength of our company. Our patent portfolio is testament to our continuous research and innovation capability.

An extensive product range for today's industrial requirements.

ELGi

ELGi

Having delivered more than 2 million compressors around the world, ELGi offers a complete range of compressed air solutions ranging from oil-lubricated and oil-free rotary screw compressors, oil-lubricated and oil-free reciprocating compressors, diesel compressors, and centrifugal compressors to dryers, filters and downstream accessories.

The company's portfolio of over 400 products has found wide application across many industries. Whether it is the paint on your wall, the car you drive, the medicines you take or the leather bag you carry, ELGi products have probably been used either in their production, maintenance or usage.

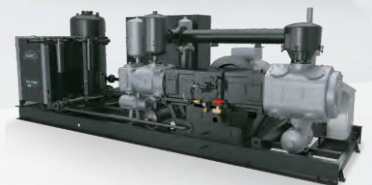

FS-ELLIOTT

FS-ELLIOTT

FS-Elliott is a global leader in the engineering and manufacturing of oil-free, centrifugal compressors with operations in over 90 countries.

Certified to deliver ISO 8573-1 Class 0, 100% oil-free air, FS-Elliott's centrifugal air compressors are ideal for industries such as food and beverage, pharmaceuticals, electronics, automotive and others that require unpolluted environments.

ABC COMPRESSORS

ABC COMPRESSORS

High pressure compressors for PET bottle blowing and for CO2 recovery in breweries, has long been a focus for ABC Compressors.

From the 80s, ABC has supplied more than 2.500 compression units in 120 countries, in close cooperation with converters, bottlers and engineering companies.

AIRCUM PIPING SYSTEM

AIRCUM PIPING SYSTEM

AIRCUM is an Italian company specialising in the design and production of high performance piping and fittings for compressed air and pressure fluid systems.

The fitment of the high quality AIRCOM aluminium piping and fittings eliminate air leaks and the associated costs of high energy consumption, as well as unplanned downtime, thus optimising the performance and efficiencies of customers' compressed air systems.
